
EASY Cal™

12.6% N 18.1% Ca (w/v)

A liquid calcium nitrate fertiliser for application through fertigation, directed soil sprays or as a foliar spray.

The features of EASY Cal

- A clear-amber coloured solution of calcium nitrate dissolved in water.
- A homogenous liquid providing uniform consistency of nitrate nitrogen and water soluble calcium at 12.6% N & 18.1% Ca (w/v).
- Product has a specific gravity (SG) of 1.5 Kg/L at 20°C. This means 1000L of EASY Cal weighs 1500kg.
- EASY Cal can be applied as a straight nitrogen fertiliser to a wide variety of horticulture crops especially those sensitive to calcium disorders.
- EASY Cal does not acidify the soil.
- EASY Cal can be readily applied through drip, sprinkler and overhead irrigation systems.
- EASY Cal supplies more calcium for every kilogram of nitrogen than solid calcium nitrate.

Benefits include:

- EASY Cal nitrate nitrogen is immediately available, even in cool conditions and in acidic soils.
- Calcium is water soluble, therefore readily available for plant uptake.
- EASY Cal can be applied in a number of ways. This allows greater flexibility and efficiency in terms of timing, rate and placement of the product.
- No bags to open.
- Labour saving, as no mixing of fertiliser required.
- Accurate rate of nitrogen per hectare.
- No down-time in waiting for products to dissolve.
